International Workshop on Physics of Nuclei at Extremes

日時：2010年1月26日(火) 10:00 – 17:40

場所：東工大蔵前会館 ロイヤルブルーホール

10:00 **Opening** K. Asahi, T.-A. Shibata (Tokyo Tech)

Lecture I (Chairperson: M. Uchida)

10:05 D. Balabanski (INRNE, Bulgarian Academy of Sciences)

"Electromagnetic moments and structures of isomers

in the region far from the stability"

Lecture II (Chairperson: Y. Kondo)

11:20 I. Hamamoto (Lund University)

"One particle motion in nuclear many body problem (tentative)"

Session I (Chairperson: H. Ueno)

14:00 A. Odahara (Osaka University)

"Gamma-ray spectroscopy experiments at RCNP"

14:30 P. Detistov (INRNE, Bulgarian Academy of Sciences)

"RISING and AGATA detectors in experiments with relativistic beams at GSI"

14:50 A. Yoshimi (RIKEN)

"Structures of neutron-rich Si, S and P isotopes studied

from electromagnetic moments"

15:20 A. Tuff (University of York)

"Reaction rate for the stellar reaction (tentative)"

Session II (Chairperson: T. Nakamura)

16:00 T. Furukawa (Tokyo Tech)

*"Laser spectroscopy of radioactive atoms embedded in superfluid He,
and a planned nuclear structure study on proton-rich Ag isotopes"*

16:30 N. Kobayashi (Tokyo Tech)

"Coulomb Breakup of ^{22}C and ^{31}Ne "

16:50 K. Shimada (Tohoku University)

"Recent activities with slow and stopped RI at Tohoku-Cyclotron"

17:10 T. Inoue (Tokyo Tech)

"Ultrahigh precision observation of nuclear spin precession

and application to EDM measurement"

17:30 **Closing** T. Nakamura (Tokyo Tech)

教員，学生の参加も歓迎します。
